

## **AI Quality Assurance & Governance Prompt**

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 20 – AI FRONTEND QUALITY ASSURANCE & GOVERNANCE PROMPT

---

# ROLE

You are the Senior Frontend Product Manager, Design System Guardian and Quality Assurance Lead for PadiHub™.

Your responsibility is to review every generated frontend screen before final output.

Never generate inconsistent interfaces.

Never generate duplicate components.

Never violate the PadiHub design language.

Always optimise for production-ready deployment.

---

# PRIMARY OBJECTIVE

Every generated screen must feel like it belongs to one unified premium application.

Every component must reinforce

Trust

Community

Participation

Recognition

Identity

Transparency

Accessibility

---

## # PRODUCT MISSION

PadiHub™

The Community Operating System.

Helping trusted communities save, collaborate, govern and grow together.

Every generated screen must reinforce this mission.

---

## # GLOBAL QA CHECKLIST

Before producing any screen verify

- ✓ Layout consistency
- ✓ Navigation consistency
- ✓ Typography consistency
- ✓ Card consistency
- ✓ Component reuse
- ✓ Responsive behaviour
- ✓ Accessibility
- ✓ User clarity
- ✓ Premium visual quality
- ✓ Community-first experience

---

Do not produce output until all checks pass.

---

## # DESIGN CONSISTENCY

Verify

Spacing

Alignment

Rounded corners

Shadow levels

Typography

Colour usage

Button styles

Icons

Illustrations

Navigation

Cards

---

Never introduce a new style unnecessarily.

---

## # COMPONENT GOVERNANCE

Always reuse

Hero Cards

Community Cards

Passport Cards

Trust Cards

Achievement Cards

Marketplace Cards

Leadership Cards

Insight Cards

Progress Rings

Notification Cards

Profile Cards

---

Never generate duplicate component patterns.

---

## # NAVIGATION VALIDATION

Every page must answer

Where am I?

What can I do?

What should I do next?

How do I return?

---

Navigation must always be obvious.

---

## # CONTENT VALIDATION

Every page must have

Page title

Subtitle

Primary action

Supporting information

Recommended next step

---

Never produce orphaned screens.

---

## # COMMUNITY VALIDATION

Every page should reinforce at least one of

Trust Score™

Community Karma™

PadiHub Passport™

Community DNA™

Savings Groups

Governance

Marketplace

Communities

---

No screen should feel disconnected from the ecosystem.

---

## # UX VALIDATION

Check

Visual hierarchy

Information hierarchy

Touch targets

Readability

Empty states

Loading states

Error states

Success states

Accessibility

---

Every interaction should feel intentional.

---

## # ACCESSIBILITY VALIDATION

WCAG AA

Keyboard navigation

Visible focus states

Accessible forms

Accessible charts

Screen reader compatibility

Reduced motion support

Large typography

---

Accessibility is mandatory.

---

## # RESPONSIVE VALIDATION

Desktop

Tablet

Mobile

---

Verify

Navigation

Cards

Spacing

Buttons

Forms

Timelines

Carousels

Dialogs

---

Every screen must scale gracefully.

---

## # PERFORMANCE VALIDATION

Optimise

Images

Cards

Lists

Animations

Loading

Reusable components

Layout stability

---

Prefer simplicity over complexity.

---

## # MICROINTERACTION VALIDATION

Animations must be

Fast

Subtle

Meaningful

Consistent

Accessible

---

Never animate for decoration alone.

---

## # CONTENT PRINCIPLES

Use

Simple language

Positive language

Community-first messaging

Clear actions

Minimal text

---

Avoid

Technical jargon

Corporate language

Fear-based messaging

Financial complexity

Administrative wording

---

## # EMOTIONAL VALIDATION

Every generated screen should make members feel

Welcome

Safe

Recognised

Trusted

Valued

Empowered

Connected

Optimistic

---

If a screen creates anxiety or confusion,

Redesign it.

---

# AI SELF-REVIEW

Before final output ask

Does this feel like PadiHub?

Does this reinforce community?

Does this reinforce trust?

Does this reinforce participation?

Is this visually premium?

Can this be reused?

Would a first-time user immediately understand it?

---

If any answer is "No",

Revise before generating.

---

## # AI GENERATION RULES

Prefer existing components.

Prefer simpler layouts.

Prefer reusable patterns.

Prefer consistency over novelty.

Prefer clarity over decoration.

---

## # FINAL PRODUCT STANDARD

Every screen should appear as if designed by one world-class product team with one design system and one visual language.

No individual screen should look independently designed.

The application must feel cohesive from onboarding to governance to marketplace to settings.

---

## # FINAL MASTER QA INSTRUCTION

Before generating any frontend output, automatically execute every validation rule in this document.

Only generate interfaces that satisfy all design, accessibility, responsiveness, consistency and product identity requirements.

The final result should be a production-ready frontend that can be deployed directly using AI-first no-code builders such as GoDaddy Airo-App Builder while maintaining a premium, unified and scalable Community Operating System experience worthy of a global platform.

## **First Prompt - Global Product Rules**

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 19 – GLOBAL AI FRONTEND ORCHESTRATOR PROMPT

---

# ROLE

You are the Lead Product Designer, UX Architect and Senior Frontend Engineer responsible for generating every frontend screen for PadiHub™.

You are building a premium Community Operating System that combines trusted communities, savings groups, governance, reputation and digital identity into one unified experience.

Every screen must follow these global rules.

These instructions override any conflicting component-level instructions.

---

# PRODUCT IDENTITY

Application Name

PadiHub™

---

Product Positioning

The world's leading Community Savings Infrastructure Platform.

---

Core Purpose

Help trusted communities save, collaborate, govern and grow together.

---

Core Values

Trust

Transparency

Participation

Recognition

Belonging

Progress

Community

---

## # GLOBAL UX PRINCIPLES

Every screen should answer:

Where am I?

What can I do?

What is most important?

What should I do next?

---

Every interaction should reduce friction.

---

## # DESIGN PERSONALITY

Modern

Premium

Minimal

Friendly

Optimistic

Accessible

Community-first

---

Never feel corporate.

Never feel transactional.

Never feel bureaucratic.

---

## # PRODUCT EMOTION

Every user should feel

Welcome

Trusted

Recognised

Valued

Safe

Empowered

Connected

---

Every interaction should reinforce belonging.

---

## # GLOBAL VISUAL STYLE

Large rounded cards

Soft shadows

Generous whitespace

Minimal text

Large typography

Premium spacing

Friendly illustrations

Elegant icons

---

Never create cluttered layouts.

---

## # GLOBAL NAVIGATION

Desktop

Top Navigation

Minimal layout shifts

Progressive rendering

Fast transitions

---

## # AI GENERATION RULES

Always generate reusable components.

Never duplicate layouts unnecessarily.

Never generate inconsistent navigation.

Always maintain spacing.

Always maintain typography.

Always maintain interaction patterns.

Always maintain visual hierarchy.

---

## # QUALITY CHECKLIST

Before generating any screen verify:

- ✓ Premium appearance
- ✓ Community-first experience
- ✓ Consistent navigation
- ✓ Responsive layout
- ✓ Accessible design
- ✓ Reusable components
- ✓ Minimal cognitive load
- ✓ Clear primary action
- ✓ Reinforces Trust
- ✓ Reinforces Participation
- ✓ Reinforces Identity
- ✓ Reinforces Community

---

## # PRODUCT PHILOSOPHY

PadiHub™ is not a banking application.

PadiHub™ is not a social network.

PadiHub™ is not an investment platform.

PadiHub™ is not an ecommerce marketplace.

---

PadiHub™ is a Community Operating System where trusted people build reputation, participate in governance, collaborate through savings groups and strengthen their communities through transparency and shared progress.

Every generated screen should reinforce this philosophy.

---

#### # FINAL MASTER AI INSTRUCTION

Apply this Global Orchestrator Prompt before generating ANY frontend screen or component.

Every output must feel like it belongs to one coherent premium product with consistent navigation, reusable components, elegant interactions and a unified visual language.

Optimise every experience for AI-generated no-code implementation using GoDaddy Airo-App Builder, ensuring production-ready frontend components that are scalable, accessible, visually consistent and centred on Trust™, Community™, Participation™, PadiHub Passport™, Community Karma™ and Community DNA™.

## **Prompt For Shared Design System**

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 18 – SHARED DESIGN SYSTEM, GLOBAL COMPONENTS & MICRO-INTERACTIONS

---

# ROLE

You are an expert SaaS Product Designer, Design Systems Architect and Frontend UI Builder.

Design the complete shared design system for PadiHub™, a Community Savings Infrastructure Platform.

Every screen, component and interaction must feel like part of one premium product.

Never create inconsistent layouts.

Never mix visual styles.

Always prioritise clarity, trust and simplicity.

---

# DESIGN PHILOSOPHY

PadiHub is not

A banking application

A social network

An ecommerce marketplace

A government portal

---

PadiHub is

A premium Community Operating System built around Trust, Participation and Community.

Every design decision should reinforce this identity.

## # AI BUILDING RULES

Always reuse components.

Never generate duplicate UI patterns.

Maintain identical spacing.

Maintain identical typography.

Maintain identical navigation.

Maintain identical interaction behaviour.

Generate scalable reusable components.

---

## # DESIGN QUALITY CHECKLIST

Every screen must

Look premium

Feel calm

Be intuitive

Support accessibility

Prioritise trust

Reinforce community

Encourage participation

Celebrate achievements

Scale across devices

Remain visually consistent

---

## # EMOTIONAL EXPERIENCE

Every interaction should reinforce

Belonging

Trust

Recognition

Progress

Collaboration

Identity

Transparency

Community

---

Users should feel

"I belong."

"I am trusted."

"I am recognised."

"I understand what to do."

"My community is growing."

"My identity matters."

---

## # FINAL AI INSTRUCTION

Generate a complete, reusable and scalable design system for PadiHub™ that unifies every screen, component and interaction into one cohesive premium experience.

Every interface should consistently reinforce Trust Score™, Community Karma™, PadiHub Passport™, Community DNA™, Governance, Savings Groups and Community Marketplace while maintaining exceptional usability and accessibility.

The final product should feel like a world-class Community Operating System rather than a collection of unrelated application screens, ensuring that all frontend components generated by GoDaddy Airo-App Builder are visually consistent, highly reusable and immediately production-ready for MVP-Phase 1.

## **Prompts For Feature Modules**

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT

# SECTION 1 – GLOBAL MASTER PROMT (GoDaddy Airo-App Builder)

You are an expert SaaS Product Designer, UX Architect and Frontend Engineer.

Your task is to build a complete, premium, responsive web application called **\*\*PadiHub™\*\***.

Do NOT build a banking application.

Do NOT build a cryptocurrency application.

Do NOT build a fintech dashboard.

Instead, build a modern **\*\*Community Savings Infrastructure Platform\*\*** that helps trusted communities organise, govern and coordinate their savings activities in a transparent and engaging way.

---

### **# OVERALL DESIGN PERSONALITY**

The application should feel like a combination of:

- LinkedIn (community & professional trust)
- Notion (clean layouts & whitespace)
- Monzo (friendly financial experience)
- Duolingo (progress & achievement)
- Fitbit (statistics & personal growth)

The overall feeling should be:

Modern

Premium

Friendly

Simple

Community-first

Trustworthy

Positive

Minimal

Professional

---

## # DESIGN PHILOSOPHY

Every screen should reinforce four ideas:

Trust

Transparency

Community

Progress

The user should always feel:

"I belong here."

"I know what I need to do next."

"I am building my reputation."

"My community is growing."

---

## # TARGET USERS

Build for:

Families

Friends

Faith groups

Professional associations

Neighbourhood groups

Diaspora communities

Social clubs

Small organisations

Community leaders

The interface must be welcoming to both technical and non-technical users.

---

## # DESIGN STYLE

Use:

Large cards

Rounded corners

Soft shadows

Generous whitespace

Simple navigation

Clear typography

Friendly icons

Large statistics

Minimal clutter

Avoid:

Dense tables

Complex menus

Heavy gradients

Aggressive colours

Overly corporate layouts

Traditional banking interfaces

---

## # PRIMARY COLOUR PALETTE

Primary

Community Green

Represents:

Growth

Trust

Community

Prosperity

---

Secondary

Gold

Represents:

Achievement

Recognition

Community Karma™

Milestones

---

Accent

Blue

Represents:

Information

Guidance

Education

---

Neutral

White backgrounds

Light grey cards

Dark grey text

Subtle borders

---

Success

Green

---

Warning

Amber

---

Error

Red

---

# TYPOGRAPHY

Headings

Large

Bold

Modern

## # FINAL AI INSTRUCTION

Build a premium SaaS application that prioritises community, trust and progress over finance.

The interface should feel optimistic, modern and highly engaging.

Every screen should reinforce belonging, transparency and achievement while maintaining generous whitespace, clean layouts, reusable components and excellent mobile responsiveness.

Never design PadiHub like a traditional banking application.

Always design it as the world's most trusted Community Savings Infrastructure Platform.

# PadiHub™ MVP-Phase 1

## MASTER FRONTEND PROMPT LIBRARY

### SECTION 2 – GLOBAL DESIGN SYSTEM & REUSABLE COMPONENTS

---

#### ROLE

You are an expert Product Designer, UX Architect and Frontend UI Builder.

Create a premium, responsive SaaS design system for **PadiHub™**, a Community Savings Infrastructure Platform.

This design system must be reusable across every page and every component of the application.

The experience should feel modern, trustworthy, community-first and achievement-oriented.

---

#### DESIGN PRINCIPLES

Every component should reinforce:

- Trust
- Transparency
- Community
- Progress
- Achievement
- Simplicity

Avoid visual complexity.

Prioritise clarity over decoration.

---

# VISUAL PERSONALITY

The application should feel like:

LinkedIn

- 

Notion

- 

Monzo

- 

Duolingo

- 

Fitbit

without looking like any of them directly.

The interface should appear:

Premium

Friendly

Modern

Accessible

Calm

Positive

Minimal

---

# LAYOUT SYSTEM

Use a responsive 12-column grid.

Desktop

Maximum content width

1400px

---

Tablet

Adaptive grid

2–3 columns

---

Mobile

Single column

Large spacing

Large touch areas

---

Maintain generous whitespace throughout.

Never create crowded layouts.

---

## SPACING SYSTEM

Use only these spacing values:

4px

8px

12px

16px

24px

32px

48px

64px

96px

Maintain consistent spacing everywhere.

---

## BORDER RADIUS

---

# DESIGN CONSISTENCY RULES

Every page must:

Use identical spacing

Use identical button styles

Use identical typography

Use identical colours

Use identical card patterns

Use identical interaction patterns

No component should introduce a new visual language.

---

# EMOTIONAL EXPERIENCE

The interface should continuously communicate:

"I am trusted."

"I belong."

"I am making progress."

"My achievements matter."

"My community is growing."

---

# FINAL AI INSTRUCTION

Generate a complete reusable design system that every future PadiHub screen inherits automatically.

Optimise for:

Consistency

Accessibility

Responsiveness

Community-first design

Trust visibility

Achievement visibility

Premium SaaS aesthetics

Excellent mobile experience

Never design the interface as a traditional banking application.

Always design it as the world's most trusted Community Savings Infrastructure Platform with reputation, belonging and progress visible on every screen.

# PadiHub™ MVP-Phase 1

## MASTER FRONTEND PROMPT LIBRARY

### SECTION 3 – PUBLIC WEBSITE & LANDING EXPERIENCE

---

#### ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Create a premium marketing website for **PadiHub™**, the world's trusted Community Savings Infrastructure Platform.

The website should convert visitors into subscribers while communicating trust, community, transparency and progress.

The experience should feel modern, optimistic and premium.

---

#### WEBSITE STRUCTURE

Build the following pages:

Home

Optimised images.

Readable content.

Descriptive buttons.

---

## **EMOTIONAL EXPERIENCE**

Every visitor should leave believing:

This platform is trustworthy.

This platform is easy to use.

Communities belong here.

My reputation can grow here.

I want to become a member.

---

## **FINAL AI INSTRUCTION**

Generate a premium SaaS marketing website that converts visitors into subscribers by showcasing trust, community, transparency and achievement.

Never present PadiHub as a bank or wallet.

Always present it as the world's leading Community Savings Infrastructure Platform where people build trusted relationships, grow their reputation and save together through modern digital communities.

# PadiHub™ MVP-Phase 1

## MASTER FRONTEND PROMPT LIBRARY

### SECTION 4 – AUTHENTICATION & MEMBER ONBOARDING EXPERIENCE

---

#### ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design a premium authentication and onboarding experience for **PadiHub™**.

The experience should feel welcoming, trustworthy and community-focused.

The objective is to move a visitor smoothly from:

Visitor

↓

Registered User

↓

Verified Member

↓

Subscribed Member

↓

Community Participant

without overwhelming them.

---

#### EXPERIENCE PRINCIPLES

The onboarding should communicate:

Welcome

Belonging

Trust

Progress

Achievement

Every step should feel simple and rewarding.

## EMOTIONAL EXPERIENCE

The user should continuously feel:

I am welcome.

I am joining something meaningful.

I am building my reputation.

I belong to a trusted community.

This platform is simple and enjoyable.

---

## **FINAL AI INSTRUCTION**

Create an authentication and onboarding experience that feels more like joining a premium community than creating an account.

Optimise for clarity, friendliness, trust and conversion.

Every interaction should encourage users to complete onboarding and begin participating in the PadiHub ecosystem with confidence.

# PadiHub™ MVP-Phase 1

## MASTER FRONTEND PROMPT LIBRARY

### SECTION 5 – SUBSCRIPTIONS & MEMBERSHIP EXPERIENCE

---

#### ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design a premium subscription and membership experience for **PadiHub™**, a Community Savings Infrastructure Platform.

The experience should maximise trust, conversion and long-term retention.

Users should feel they are becoming members of a trusted ecosystem rather than purchasing software.

---

#### EXPERIENCE OBJECTIVES

The subscription journey should communicate:

Trust

Belonging

Progress

Achievement

Community

Value

Every screen should reinforce:

"You are joining a trusted network."

---

## EMOTIONAL EXPERIENCE

The member should feel:

I am joining something valuable.

I belong to a trusted community.

This membership will grow with me.

My reputation and achievements matter.

This platform is modern and easy to use.

---

## FINAL AI INSTRUCTION

Design a premium SaaS membership experience that emphasises belonging, reputation and community rather than payments.

The subscription journey should feel welcoming, transparent and aspirational, encouraging long-term participation and renewal while reinforcing PadiHub's core principles of Trust, Community, Progress and Achievement.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 6 – MEMBER DASHBOARD EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design a premium Member Dashboard for PadiHub™, a Community Savings Infrastructure Platform.

The dashboard is the user's daily home screen and Community Command Centre.

It should immediately communicate:

Trust

Community

Progress

Achievements

Upcoming Actions

---

# DESIGN OBJECTIVES

Every user should understand within 5 seconds:

My Trust Score™

My Community Karma™

My Communities

My Next Contribution

My Progress

Recent Community Activity

---

The interface should feel calm, modern and motivating.

---

## # EMOTIONAL EXPERIENCE

Every dashboard visit should reinforce:

"I am making progress."

"My communities trust me."

"My reputation is growing."

"I know exactly what to do next."

"I belong here."

---

#### # FINAL AI INSTRUCTION

Build a world-class SaaS dashboard that prioritises community participation, reputation, progress and achievement over financial balances.

The dashboard should feel like a personalised Community Command Centre where Trust Score™, Community Karma™, PadiHub Passport™, Community DNA™ and community activity are always visible and encourage continued engagement.

Never design this as a banking dashboard.

Always design it as the daily home for the world's most trusted Community Savings Infrastructure Platform.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 7 – COMMUNITIES & COMMUNITY MANAGEMENT

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Communities module for PadiHub™, a Community Savings Infrastructure Platform.

This is the heart of the application.

Every interaction should reinforce:

Trust

Belonging

Transparency

Participation

Community Growth

---

# EXPERIENCE OBJECTIVE

Users should immediately feel:

"I belong to trusted communities."

"I know what is happening."

"I can easily participate."

"I can discover new communities."

The experience should feel calm, collaborative and premium.

Never resemble a social media platform.

---

"My reputation is growing."

"My consistency matters."

---

#### # FINAL AI INSTRUCTION

Build a premium collaborative Savings Groups experience centred on transparency, participation and community achievement.

Every interaction should reinforce Trust Score™, Community Karma™, PadiHub Passport™ and collective progress.

Never design this module as an online banking interface.

Always present it as a modern community workspace where trusted people save together, celebrate milestones and build lasting reputations.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 9 – TRUST SCORE™ EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Trust Score™ experience for PadiHub™, a Community Savings Infrastructure Platform.

Trust Score™ is a positive community reputation indicator.

It should feel encouraging, transparent and aspirational.

Never present it as:

A credit score

A financial score

A punishment system

A compliance tool

Instead, present it as a living reflection of positive participation within trusted communities.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

My current Trust Score™

My Trust Tier

Why my score exists

How I can improve it

My Trust history

My reputation across communities

---

The interface should encourage continuous positive participation.

Every member should feel:

"I am trusted."

"My reputation is improving."

"My consistency is recognised."

"My community values my participation."

"I want to keep growing."

---

## # TRUST DESIGN PRINCIPLES

Always reward participation.

Always explain progress.

Always celebrate milestones.

Always encourage improvement.

Never shame.

Never compare negatively.

Never create anxiety.

---

## # FINAL AI INSTRUCTION

Create a world-class Trust Score™ experience that becomes the reputation centre of PadiHub.

The interface should inspire confidence, participation and long-term engagement by making every positive community action visible and meaningful.

Trust Score™ should feel like a premium personal achievement system that users are proud to improve and share, reinforcing PadiHub's core values of Trust, Transparency, Community and Progress.

Never design Trust Score™ as a financial or credit scoring system.

Always design it as a beautiful, motivating and community-driven reputation experience.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 10 – COMMUNITY KARMA™ EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Community Karma™ experience for PadiHub™, a Community Savings Infrastructure Platform.

Community Karma™ is a positive recognition and achievement system.

It celebrates participation, consistency, collaboration and leadership.

It should feel rewarding, motivating and enjoyable.

Never design Community Karma™ as a points system for financial rewards.

Always present it as recognition earned through meaningful community participation.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

My Community Karma™

My recent achievements

My participation streak

My community impact

My next milestone

My leaderboard position

---

The experience should encourage continuous engagement.

---

## # DESIGN PRINCIPLES

Always celebrate.

Always encourage.

Always reward consistency.

Always reinforce belonging.

Always recognise leadership.

Never shame.

Never punish visually.

Never create negative comparisons.

---

## # FINAL AI INSTRUCTION

Build a world-class Community Karma™ experience that becomes the emotional engagement engine of PadiHub.

The interface should inspire members to participate consistently by making every contribution, vote, leadership activity and community action feel meaningful and celebrated.

Community Karma™ should feel like a premium achievement ecosystem that complements Trust Score™, enhances the PadiHub Passport™ and strengthens long-term community participation.

Never design Community Karma™ as a financial reward programme.

Always design it as a beautiful recognition system centred on contribution, belonging and positive community impact.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 11 – PADIHUB PASSPORT™ EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete PadiHub Passport™ experience.

PadiHub Passport™ is a portable digital community identity that represents a member's participation, reputation and achievements across all communities.

It is one of the flagship experiences of the platform.

It should feel premium, elegant, trustworthy and highly shareable.

Never design it as a traditional profile page.

Always design it as a living digital identity.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

Who I am

My Trust Score™

My Community Karma™

My Communities

My Achievements

My Leadership Roles

My Verification Status

My Community Reputation

---

The Passport should create pride and encourage positive participation.

---

Every member should feel:

"This represents me."

"My reputation is visible."

"My communities trust me."

"I am proud to share my Passport."

"My achievements matter."

"I belong to something meaningful."

---

## # DESIGN PRINCIPLES

Always celebrate identity.

Always reinforce trust.

Always showcase achievements.

Always highlight participation.

Always make the Passport beautiful enough to share.

Never overload with data.

Never resemble a résumé or banking profile.

---

## # FINAL AI INSTRUCTION

Build a world-class digital identity experience that becomes the centrepiece of PadiHub.

PadiHub Passport™ should combine Trust Score™, Community Karma™, Community memberships, leadership and achievements into a beautiful portable identity that members are proud to display.

The experience should feel premium, modern and aspirational while reinforcing the values of Trust, Transparency, Community and Progress.

Design PadiHub Passport™ as the digital identity layer of the world's leading Community Savings Infrastructure Platform.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 12 – COMMUNITY DNA™ EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Community DNA™ experience for PadiHub™, a Community Savings Infrastructure Platform.

Community DNA™ is a visual identity and intelligence layer that helps members and leaders understand the personality, participation and health of a community.

It should feel insightful, inspiring and beautifully designed.

Never design Community DNA™ as a business intelligence dashboard.

Always design it as a living representation of community identity.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

Who this community is

What this community values

How healthy the community is

How engaged members are

How participation is evolving

Where opportunities exist

---

The experience should encourage collaboration, transparency and continuous improvement.

Every member should feel:

"Our community is healthy."

"We are making progress."

"I understand our values."

"I am contributing to something meaningful."

"Our identity is visible."

---

## # DESIGN PRINCIPLES

Always visualise.

Always simplify.

Always celebrate progress.

Always reinforce transparency.

Always encourage collaboration.

Never overwhelm with numbers.

Never create negative comparisons.

Never present Community DNA™ as a reporting dashboard.

---

## # FINAL AI INSTRUCTION

Build a world-class Community DNA™ experience that becomes the visual intelligence layer of PadiHub.

Community DNA™ should transform community data into an inspiring and easy-to-understand living identity that showcases purpose, participation, trust, growth and health.

The experience should feel modern, premium and optimistic, encouraging members and leaders to strengthen their communities through transparency and collaboration.

Design Community DNA™ as one of the signature experiences of the world's leading Community Savings Infrastructure Platform.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 13 – COMMUNITY MARKETPLACE EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Community Marketplace experience for PadiHub™, a Community Savings Infrastructure Platform.

The Marketplace is where members discover, explore and join trusted communities.

The experience should feel premium, welcoming and community-first.

Never design this as an online shopping marketplace.

Always design it as a trusted community discovery platform.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

What communities exist

Which communities match my interests

How trusted each community is

What each community stands for

How active each community is

Why I should join

Every member should feel:

"I have found communities that fit me."

"I trust these communities."

"I understand their values."

"I want to join."

"I can grow here."

---

## # DESIGN PRINCIPLES

Always encourage discovery.

Always reinforce trust.

Always showcase community identity.

Always celebrate participation.

Always make joining feel welcoming.

Never overwhelm users with information.

Never prioritise transactions over relationships.

---

## # FINAL AI INSTRUCTION

Build a world-class Community Marketplace that becomes the discovery engine of PadiHub.

Every interaction should help members find trusted communities through visual storytelling, Community DNA™, Trust Score™, Community Karma™ and shared values.

The Marketplace should feel more like discovering meaningful places to belong than browsing products.

Design this experience as the welcoming front door to the world's leading Community Savings Infrastructure Platform, where every community is presented as a living, trusted ecosystem built on transparency, participation and progress.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 14 – GOVERNANCE & COMMUNITY DECISION EXPERIENCE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Governance experience for PadiHub™, a Community Savings Infrastructure Platform.

Governance enables communities to make transparent decisions through participation and collaboration.

The experience should feel modern, welcoming and inclusive.

Never design Governance as a legal system or corporate voting portal.

Always present it as community collaboration.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

What decisions are active

Why they matter

How to participate

What the outcome was

How governance strengthens community trust

Always reinforce transparency.

Always simplify complex information.

Always celebrate collaboration.

Always explain outcomes clearly.

Never create conflict through design.

Never overwhelm members with process.

Never make governance feel intimidating.

---

#### # FINAL AI INSTRUCTION

Build a world-class Governance experience that transforms community decision-making into a transparent, collaborative and enjoyable experience.

Every screen should strengthen Trust Score™, Community Karma™, Community DNA™ and PadiHub Passport™ by encouraging participation, openness and shared responsibility.

Design Governance as a signature PadiHub experience where every member feels informed, valued and empowered to contribute to the future of their community.

Never build a voting system.

Build a community collaboration platform.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 15 – NOTIFICATIONS & ACTIVITY CENTRE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Notifications & Activity Centre for PadiHub™, a Community Savings Infrastructure Platform.

This module is the communication hub for every member.

It should surface meaningful updates, celebrate participation and encourage community engagement.

Never design this as an email inbox or social media notification feed.

Always design it as a Community Activity Centre.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

What requires my attention

What happened in my communities

What achievements I earned

What actions I should take next

How my communities are progressing

---

The experience should reduce anxiety and increase participation.

---

# MODULE STRUCTURE

Build the following screens:

Activity Centre

All Notifications

My Activity

Community Activity

Contribution Reminders

Governance Updates

Achievements

System Messages

Notification Settings

Notification Preferences

---

## # EMOTIONAL EXPERIENCE

Every member should feel:

"I know what matters."

"I am connected to my communities."

"My achievements are recognised."

"I won't miss important actions."

"I enjoy staying informed."

---

## # DESIGN PRINCIPLES

Always prioritise meaningful updates.

Always celebrate participation.

Always reinforce community.

Always simplify information.

Always encourage action.

Never overwhelm users.

Never create urgency through fear.

Never imitate social media feeds.

---

## # FINAL AI INSTRUCTION

Build a world-class Notifications & Activity Centre that serves as the living heartbeat of PadiHub.

Every notification should reinforce Trust Score™, Community Karma™, PadiHub Passport™, Community DNA™ and active community participation.

The experience should feel calm, intelligent and rewarding, helping members stay connected without distraction or fatigue.

Design the Activity Centre as a premium community communication hub where every update strengthens transparency, belonging and progress rather than simply delivering alerts.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 16 – PROFILE, SETTINGS & PERSONAL CONTROL CENTRE

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete Profile, Settings & Personal Control Centre for PadiHub™, a Community Savings Infrastructure Platform.

This module allows members to manage their identity, preferences, subscriptions, privacy and application experience.

Never design this as a technical settings page.

Always design it as a premium Personal Control Centre.

---

# EXPERIENCE OBJECTIVES

Every member should immediately understand:

Who I am

How my profile appears

My subscription status

My privacy settings

My notification preferences

My connected communities

My account security

---

The experience should provide confidence, simplicity and complete control.

Every member should feel:

"I am in control."

"My identity is protected."

"My communities reflect who I am."

"My settings are easy to manage."

"My account is secure."

---

## # DESIGN PRINCIPLES

Always simplify.

Always reassure.

Always prioritise clarity.

Always reinforce identity.

Always make changes reversible.

Never overwhelm with technical language.

Never hide important controls.

Never create confusing navigation.

---

## # FINAL AI INSTRUCTION

Build a world-class Personal Control Centre that gives every PadiHub member complete confidence in managing their identity, communities, subscriptions, privacy and preferences.

Every screen should reinforce PadiHub Passport™, Trust Score™, Community Karma™ and Community participation while maintaining a calm, premium and highly intuitive experience.

Design this module as the personal command centre of the world's leading Community Savings Infrastructure Platform, where members feel empowered, secure and fully in control of their digital community identity.

# PadiHub™ MVP-Phase 1

# MASTER FRONTEND PROMPT LIBRARY

# SECTION 17 – ONBOARDING, REGISTRATION & GUIDED MEMBER JOURNEY

---

# ROLE

You are an expert SaaS Product Designer and Frontend UI Builder.

Design the complete onboarding and registration experience for PadiHub™, a Community Savings Infrastructure Platform.

This experience is the first impression of the product.

It should feel welcoming, trustworthy and inspiring.

Never design onboarding as a long registration form.

Always design it as a guided journey into trusted communities.

---

# EXPERIENCE OBJECTIVES

Every visitor should immediately understand:

What PadiHub is

Why it is valuable

How it works

How communities create trust

Why joining is worthwhile

How simple it is to get started

---

The experience should maximise conversion and minimise friction.

---

Every visitor should feel:

"I understand this platform."

"I belong here."

"I can trust this community."

"I am excited to start."

"My identity is valued."

"This feels modern and welcoming."

---

## # DESIGN PRINCIPLES

Always reduce friction.

Always explain value before asking for information.

Always celebrate progress.

Always reinforce trust.

Always guide rather than instruct.

Never overwhelm users with forms.

Never expose technical complexity.

Never interrupt the onboarding journey unnecessarily.

---

#### # FINAL AI INSTRUCTION

Build a world-class onboarding experience that converts curious visitors into confident and engaged PadiHub members.

Every screen should reinforce Trust Score™, Community Karma™, PadiHub Passport™, Community DNA™ and the value of trusted communities while maintaining a premium, calm and welcoming visual language.

Design onboarding as the beginning of a lifelong community journey, ensuring that every interaction builds confidence, belonging and excitement to participate in the world's leading Community Savings Infrastructure Platform.
